Dolphins are really one of the wonders of creation. They live in small groups. In the group, they can defend one another. They are warm-blooded sea animals. Their different sizes are amazing. The largest dolphin is about 11 tons and the smallest one is around 90 pounds. These clever animals can hear about 10 times better than humans. They also have very good vision but their sense of smell is not so good. One more wonderful fact about them is that they have 100 teeth but, they don't use them for eating. They get the fish and swallow them. There are a lot more to learn about this wonderful animal.

1. Dolphins have the same sizes

A. True

☒ B. False

5. How do the dolphins live?

They live in small groups.

Winter is cold in some places. Many plants do not grow during winter. Some plants die. Snow and ice may cover the ground. It can be hard for animals to find food during winter. Animals get through this time in many ways. Birds can fly. Many of them fly to other places. They just leave. They go to a place with good weather. Then they come home in the spring. We call this migration. Migrating is leave in winter and come back in spring. Another good way to protect from cold is to sleep through winter. Many animals sleep during the winter. Bear is one of these animals.

١. All animals migrate in winter
