Thirteen milliard cells connect all the parts of body together. The brain has ten milliard of the nerve cells and the rest goes to skin and other nervous systems.

Our brain receives more than one hundred million messages in a second from different nervous systems.

True (✓) False ? (x)

1. There are thirteen milliard nerve cells in the brain. T F
2. The brain is the most important part of our body. T F
3. How many messages does the brain receive in a second?

.....  
4. What does our brain do?  
.....

## 10. Read the text below and answer the questions. (3)

Did you know that our Sun is just one star among many in the universe? The fact that the sun is the closest star to Earth, makes it look much larger and brighter than other stars. It is at the center of our solar system. The Sun, all the planets and their moons, and other objects that revolve, or travel, around it make up the solar system. The solar system itself is only a small part of a huge system of stars and other objects called the Milky Way galaxy. The solar system orbits the center of the galaxy about once every 225 million years. The Milky Way galaxy is just one of billions of galaxies that in turn make up the universe.

### I. Is it true or false? (1)

1. The solar system is a part of the Milky Way galaxy. T F
2. The sun is closer than other stars to Earth. T F

### II. Choose the best answer.(2)

3. Our solar system is .....

- a. almost 225 million years old
- b. just one of the galaxies in the universe
- c. turning around the "Milky Way" galaxy
- d. at the center of universe

4. Our sun is much larger than .....

- a. the planets that are orbiting it
- b. other stars in the "Milky Way" galaxy
- c. the galaxies that make up the universe
- d. the "Milky Way" galaxy
