Human body is a wonderful machine. It continues to work, without stopping for a second. The main organs of the human body are lungs, heart, kidney, liver and brain. These organs work together which are controlled by the brain. When organs work together, they are called systems. The brain gives us intelligence to use our physical and mental abilities. In fact, it is the most complex part of the human body. There are more than ۲۰۰ different cell types in our body. It is safe to say that our body is the most valuable gift of God. A healthy body contains a healthy brain. A healthy brain contains a healthy soul. As such, it is very important to take care of our body. Doing daily exercise is one way to keep our body healthy

**True / False**

۱. The human body works without stopping for a second.      True      False

۲. The heart is the most complex part of the human body.      True      False

**Fill in the blanks with proper words from the text.**
